MUHAMMAD NAWAS RAZA GILLANI

Full-Stack Developer · AI / LLM Applications

Islamabad, Pakistan (PKT, GMT+5) · +92 330 538 8907 · nawasatwork@gmail.com · LinkedIn · GitHub

Open to remote roles

PROFESSIONAL SUMMARY

Full-stack developer (BSc Computer Science, 2026) who ships production software end-to-end: MERN and Next.js applications delivered to live clients, plus applied-AI features built on the OpenAI API with retrieval-augmented generation (RAG) over client documents. Currently full-time at Auxilio Tech building enterprise Angular applications, after promotion from a three-month internship. Targeting full-stack, AI, or applied-AI engineering roles.

EXPERIENCE

Full-Stack Developer, Auxilio Tech **Jan 2026 - Present**

Islamabad, Pakistan

- Develop and maintain enterprise web applications in Angular, TypeScript, JavaScript, SQL, HTML and CSS within a production engineering team.
- Ship product features on schedule alongside cross-functional engineering and QA.
- Promoted from a three-month internship to full-time based on delivery performance.

Web Developer (Frontend), Internship, Quantum Media Labs **2025 - 3 months**

- Built and customized client websites across service and e-commerce verticals, owning frontend implementation from build through deployment.
- Shipped two live production sites: autotroop.us (towing services) and tamiratico.com (road-project services).

PROJECTS

Nakhsh - Boutique E-Commerce Platform Live site

MongoDB · Express · React · Node.js

- Sole developer: designed, built and deployed the platform end-to-end - product catalogue, collections, cart, wishlist, and cash-on-delivery checkout with order calculation logic.
- Owned the full lifecycle from system architecture to production deployment on a live custom domain.

LLM-Powered PDF Knowledge Base Chatbot *Freelance*

OpenAI API · embeddings · retrieval-augmented generation (RAG)

- Built a production chatbot that answers visitor questions against a client's PDF knowledge base using document chunking, embeddings and retrieval, keeping answers grounded in source documents.
- Designed the retrieval and prompt structure to keep responses accurate and context-aware.

HUMN Solutions - Corporate Website Live site

Next.js

- Designed and shipped a six-page marketing site for an HR consultancy, implementing SEO metadata and Open Graph / Twitter card tags; deployed to a live custom domain.

Automated Product Catalogue Sync GitHub repo

Python · pandas · WooCommerce REST API · FTP · cron

- **Built:** unattended Python engine syncing a legacy AS400 ERP into a live WooCommerce tyre store - FTP ingest, 26-column parser, SKU matching, and diffed create/update/skip, hourly via cron.
- **Problem:** manual ERP-to-shop imports didn't scale across thousands of SKUs and drifted silently. 5-star client rating.
- **Broke:** serial REST calls overran the sync window, HTTP 429s, duplicate SKUs, and stale storefront filters.
- **Solved:** thread-pooled batched writes with retry/backoff, dedup-before-write, and a resumable MD5 state file.

Finance Podcast Intelligence Dashboard GitHub repo

Python · Flask · SQLite · OpenAI Whisper & GPT

- **Built:** self-hosted Flask pipeline that ingests finance podcasts and YouTube channels, then transcribes (Whisper), summarizes (GPT) and translates to Persian - served via a dashboard and REST API.
- **Problem:** manual curation took hours per episode; collapsed to an unattended, roughly four-click batch job. 5-star client rating.
- **Broke:** Whisper's 25 MB cap, GPT summaries truncated mid-sentence, and garbled, left-to-right Persian output.
- **Solved:** pydub chunk-and-join transcription, hierarchical map-reduce summarization, and Persian text cleanup with forced RTL.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS
Frontend: React, Next.js, Angular, NG-Zorro
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, SQL
AI & LLM: OpenAI API, RAG (retrieval-augmented generation), embeddings & vector search, prompt engineering
Tools: Git, GitHub, Cursor
Currently learning: LangChain, LangGraph, CrewAI, FastAPI, n8n

EDUCATION

BSc Computer Science - SZABIST Islamabad **2022 - 2026**
